

## \$150 Monthly Maintenance Package

**1. One hour of my time / month. Does not roll over.**

Use this to add content to the website, talk about your new ideas, or learn about my other services, i.e. Digital Ads, Social Media Management etc. Zoom, phone call, or in person (Dallas area).

**2. Premium Cloud Hosting Speeds via Hostinger.**

This means your website will be faster. This would cost you \$600/year.

**3. Security monitoring, performance scans, and uptime notifications.**

If there is a security issue, your website starts slowing down considerably, or if your website is down, (meaning your website cannot be viewed) I handle it immediately and before you or your users know about it.

**4. Monthly video report, automated spreadsheet, and analytics install.**

I provide a 3-5 minute monthly video of how your website is performing.

Analytics are stats like

- How fast is your website loading,
- What words people are finding you on Google for?
- How many people came to my website?
- How many of those people clicked the call button?
- How many people became a lead?

I also create an automated spreadsheet that you can access anytime that allows you to quickly see all leads and their info.

**5. Daily backups of the website and database in 5 separate locations.**

**6. Updates to software, certificates, tools, plugins, etc.**

**7. Emergencies**

All Monthly Maintenance package holders get my personal email and phone number. I usually handle any updates within 24 hours of you asking for it.

If you only need the Essentials, I offer a \$75/month subscription. This Essentials package includes everything above **except numbers 1 and 4.**

*Maintenance packages are month to month and can be canceled anytime. I require a 30 days notice of cancellation. You'll need to set up your own hosting and purchase your own Elementor license.*
